

How to set up Internet Explorer version 11

Launch Windows Internet Explorer and open **Tools**  / **Internet Options**.

Now open the tab **Security**, click the **Trusted sites** icon, click the button **Sites**.

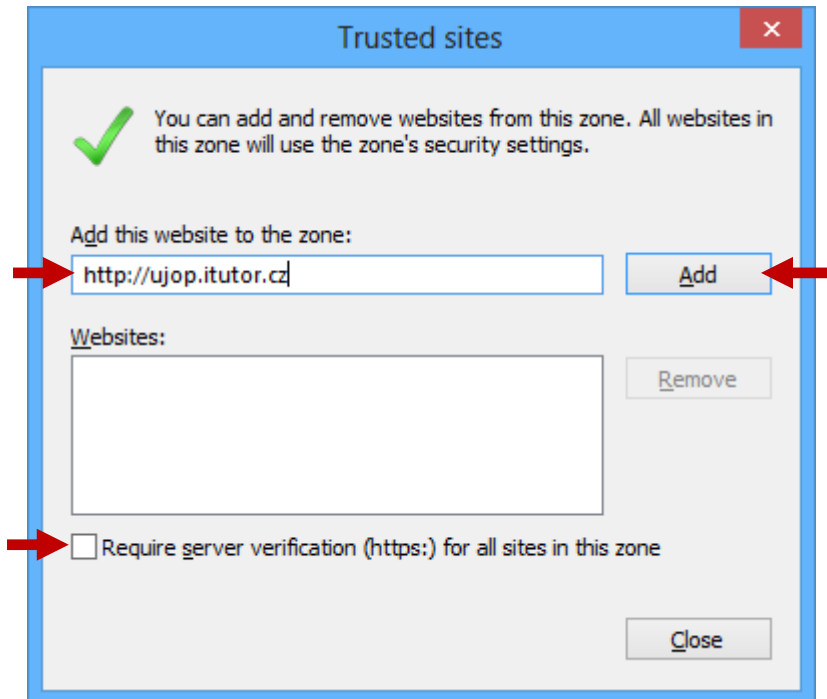

Browser settings

If **Require server verification (https:) for all sites in this zone** is checked, it must be unchecked.

Fill in the following address: <http://ujop.itutor.cz> in the text box **Add this website to the zone** and click **Add**.

If the option **Require server verification (https:) for all sites in this zone** was originally checked, you can check it again.

Close the window by clicking the **Close** button.

Close the **Internet Options** window by clicking **OK**.

Your browser should be set to support proper functioning of the learning management system.

CAUTION

Pop-up blocker settings stated above are valid for the browser only. If any other security software is used (firewall, antivirus, antispysware, etc.) in your computer, make sure that pop-ups from <http://ujop.itutor.cz> are not blocked by such software.

Make sure you do not have any software or plug-ins installed which could block or filter communication with the learning management system iTutor, for example various toolbars such as Google® Toolbar, Yahoo!® Toolbar, or ICQ® Toolbar. If there is any kind of such software, you must disable it from blocking or filtering communication with the web server ujop.itutor.cz.
