# Foundation Programmes: Arts and Architecture

---

MOEMI, Japan - Intensive Czech course, respected artist"UJOP is not an ordinary language school, it provides experiences that help you to enjoy life here."

"I think that without studying at UJOP, I wouldn't have been able to get a good result in the AVU entrance exam. I had a B2 level which made me understand everything they asked me in the exams.

During the three semesters I learned to communicate in the Czech language. We also learnt practical skills, such as how to make phone calls or write emails in Czech. I remember how we tried to make a doctor's appointment, a hairdresser's appointment, order some goods, book a table in a restaurant... In addition, we also learned interesting things about Czech culture. I am also still in contact with several former classmates, friends from UJOP. Teachers at UJOP are very nice, kind and, in my opinion, they love their job. I could also experience different activities like concerts and exhibitions. I also remember meeting Czech students."

Oleksandra, Ukraine – Arts and Architecture"The portfolio preparation courses proved to be the most useful for the entrance exam."

"The **portfolio preparation courses proved to be the most useful for the entrance exam** to the Faculty of Architecture at the Czech Technical University in Prague. We received a lot of practical advice and real examples of past students' work and tackled potential questions from the admissions committee. I got 4 out of 5 points in the interview and was admitted to a university I never dreamed of two years ago."
