<div class="flex-container"> <div class="flex-item-30"> </div> <div class="flex-item-70"> <p>You will study the principles of technical implementation of the main facets of computing, from hardware, operating systems and networking to the principles of secure and efficient data storage. In addition to that, you will gain knowledge of basic mathematics and computer theory. The studying combines lectures with seminars and constant practical testing of your knowledge and skills. Also, there are usually a number of financially rewarding internship opportunities in the field, or you can join a semester project at our faculty. All this will fully prepare you for your future job as a programmer, developer or computer systems administrator.</p>
 <p>The classes are conducted at the Faculty of Informatics at Masaryk University. Find the detailed admission requirements here. (updated 19.04.2023).</p> <p>Admission requirements: A studying aptitude test.</p> <p>Level of the Czech language proficiency: B2. Read about language proficiency here.</p> </div> </div>
